SUMMARY

Software Developer with 1+ year of experience building production web applications and REST APIs with JavaScript, React.js, Next.js, Node.js, Express.js and Spring Boot. Designed and deployed VYARA, a multi-tenant shop management SaaS running in production, covering inventory, billing, payments and invoicing on PostgreSQL with JWT authentication. Experienced in relational database design, API integration, query optimization and debugging.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, SQL, HTML5, CSS3, C++

Frontend: React.js, Next.js, React Native, Tailwind CSS, shadcn/ui, Zustand

Backend: Node.js, Express.js, Spring Boot, Spring Data JPA, Hibernate, REST APIs, JWT Authentication

Databases: PostgreSQL, MySQL, MongoDB

Tools & Platforms: Git, GitHub, Jira, Postman, Vercel, Render, Neon, Agile / Scrum

Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS, System Design Fundamentals

PROFESSIONAL EXPERIENCE

Associate Software Developer, TopGrep Tech Pvt. Ltd. (Client: Zinier) *Bangalore, India | Mar 2026 - Sep 2026*

- Configure Zinier Studio, a low-code field service management platform, delivering 20+ JSON-driven workflow configurations, page and panel UIs and JavaScript process rules.
- Implemented technician dispatch, work order management and mobile task-flow features for enterprise field service teams.
- Developed and integrated 5+ REST APIs using Node.js, Express.js and MySQL for authentication and data management.
- Extended AiVagam Labs, an EdTech platform, with 3 backend APIs for lab management, and resolved front-end defects.
- Reviewed, debugged and tested 20+ issues with cross-functional teams using Git, Jira and Agile/Scrum.

Software Developer, Vizva Consultancy Services *Ahmedabad, India | May 2025 - Dec 2025*

- Developed 5 REST endpoints and service-layer logic in Spring Boot, and released bug fixes through peer code review.
- Built React.js internal tools, including an AI-powered Feedback Mail Generator using the Google Gemini API, adopted by the team.
- Debugged and resolved defects across 20+ REST APIs using Spring Boot and Postman, improving API reliability.
- Documented 5+ APIs and workflows to cut developer onboarding effort, and triaged issues during sprint planning.

PROJECTS

VYARA: Multi-Tenant Shop Management SaaS | Full Stack | vyara.dpdns.org *Aug 2026*

- Built and deployed a shop management SaaS with 39 REST endpoints using Next.js, Express.js and PostgreSQL for inventory, billing, payments and invoicing.
- Designed an 8-table PostgreSQL schema with 17 indexes and row-level locking to prevent stock inconsistencies during concurrent sales.
- Implemented JWT authentication with email verification, password reset, session revocation and tenant-scoped API access.
- Generated invoice PDFs and 3 date-range reports with server-side pagination, search and filtering.

MoneyMap: Expense Tracking Application | Mobile App | github.com/izanahmad8/MoneyMap *Jul 2025 - Aug 2025*

- Created a mobile-first expense tracker using React Native, Spring Boot, Spring Data JPA and PostgreSQL, with 5+ REST APIs for transactions, categories and monthly summaries.

Borcelle Kitchen: Food Ordering Web Application | Full Stack | borcelle-kitchen.vercel.app *May 2024 - Jun 2024*

- Launched a MERN food-ordering application serving 30+ users, with JWT and bcrypt authentication and role-based admin access; integrated Razorpay payments and order management.

EDUCATION

B.Tech, Computer Science and Engineering, Uttarakhand Technical University | Dehradun | 2021 - 2025 | CGPA: 8.32/10

ACHIEVEMENTS

- Led a 4-member team to 1st place in the CodeChronicles 24-hour Hackathon, coordinating task allocation, development and deployment of the working prototype.
- Solved 1000+ Data Structures and Algorithms problems across LeetCode and GeeksforGeeks.
